

Staff Must Have Products

When it comes to my skincare my eyes come first. I never miss a day of using my Latisse and SkinCeuticals A.G.E. Eye Cream. The results of Latisse on my lashes have been amazing. My lashes are thick, dark and longer than ever. I love the compliments I receive and the shocked faces when people find out they're really my lashes! With everyone looking at my lashes I need to keep my eyes looking refreshed and young. That's why I use A.G.E. Eye Complex. Every morning and night I can feel the cream giving my eyes instant moisture that lasts all day. My makeup wears better and my crow's feet have softened. This wonderful cream also helps minimize eye puffiness. I do believe A.G.E. Eye Cream is a miracle in a jar! Just ask my mom. This cream is what she asks for every birthday and Christmas!

~Jessica

Botox/Xeomin – Personally I use in the glabella area and outer brow area. This treatment makes me look fresh, 'happy', and gives me an INSTANT brow lift. PLUS it relieves my headaches. Feel better and look better all in one treatment!

~Renee

My favorite product is SkinCeuticals Blemish + AGE Defense because it's a 2 for 1 deal! It's designed for acne prone adults, which is so common now, but also helps pigment, fine lines and inflammation. It's also good for all skin types....can't beat that!

~Shirley

My must have product is SkinMedica's Skin Polisher. I love that it gets rid of all the dead skin and allows my face too look and feel smoother. It's also a great makeup primer by helping my makeup glide on better and stay on longer.

~Danielle

My must have skin care product would be Skin Ceuticals Blemish and Age defense. I use this product every day, twice a day and it has made a huge difference in the texture and appearance of my skin by getting rid of any acne that I have and by preventing new acne from occurring. If I could only pick one product to use, it would definitely be this product. I feel that blemish and age defense provides me with the most noticeable difference out of the products in my skincare regimen.

~Heather

No matter if it is a lifestyle change, a change in the weather, or the addition of one more candle on your birthday cake each year, the brutal truth about your skin is that it will ALWAYS test you. Cleansing, toning and moisturizing will help you pass the exam, but the goal is to A.C.E. it! And these are the 3 vitamins you want included in your skincare regimen: Vitamin A, Vitamin C and Vitamin E. Therefore, my year round go to products are SkinMedica's Tri-Retinol Complex ES and Vitamin C + E Complex.

~Candyce

One of my favorite products would be Gentle Cleanser because it works beautifully as a makeup remover and is gentle on the eyes.

~Darlene

SkinCeuticals Vitamin B5 Hydrating Gel... I would never leave home without it. It is light, refreshing, and it gives moisture without clogging my pores. I love the way it feels and even more the way it makes my face feel. Great product for sensitive skin like mine!

~Denise

My go to, cannot live without product is Latisse. Just ask to see my before and after pictures and you will understand why!!! I also never go a day without using my LHA cleanser and LHA solution. It has done wonders to control my acne and keep my skin glowing so I can spend my weekend's make-up free!!!

~Nicole

My favorite product would have to be SkinMedica TNS Essential Serum. It is the perfect complement for most treatments, services and procedures we offer in the practice. Aging is a continuous process and this product has 5 key factors all in one. It is great for collagen stimulation, reducing fine lines and wrinkles, and has antioxidants for protection. I encourage both men and women over 35 to add this to their daily regimen. You will notice a difference in 90 days!

~Dr. Leverett
